

# MODULE MANUAL

---

*For Module **Custom Invoice** – Prestashop version 1.5.x and upper*

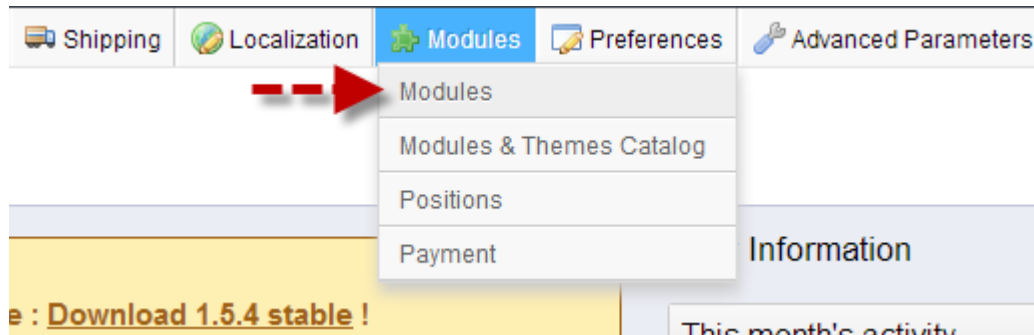

*Thank you for purchasing this module.  
Any comments or suggestions are appreciated.*

## Contents

1	Install module .....	1
2	Add-ons .....	2
2.1	Hide custom invoices from default box “Documents” .....	2
2.2	Show custom invoices in history page (frontend) .....	3
3	Screenshots .....	4

## 1 Install module

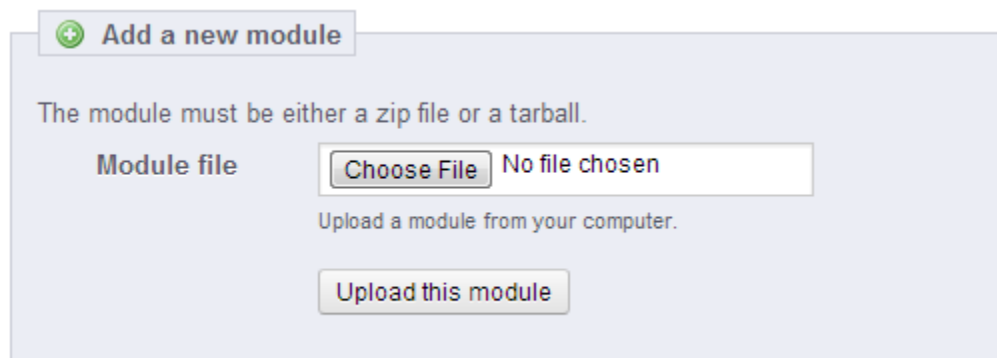

- In the Back Office, go to Modules

- Click on **Add new modules** in the upper right hand side

- In Add new module page, click “**Browse**” button and locate the “**hscustominvoice.zip**” file in the download package from us.

- Click on “**Upload this module**” button.
- In the “**Modules**” tab, search for “**Custom Invoice**” to locate to the module. Click “**Install**”

Now this module is ready to use.

## 2 Add-ons

### 2.1 Hide custom invoices from default box “Documents”

By default, custom invoices and non-custom invoices are displayed together in the box “Documents”. Custom invoices are also displayed in its own box “Custom Invoices”.

To hide custom invoices from default box “Document”:

- Locate to the file /addons/override/classes/order/Order.php
- Locate to your web root and copy this file to /override/classes/order/

## 2.2 Show custom invoices in history page (frontend)

To show all custom invoices in the history page of customer:

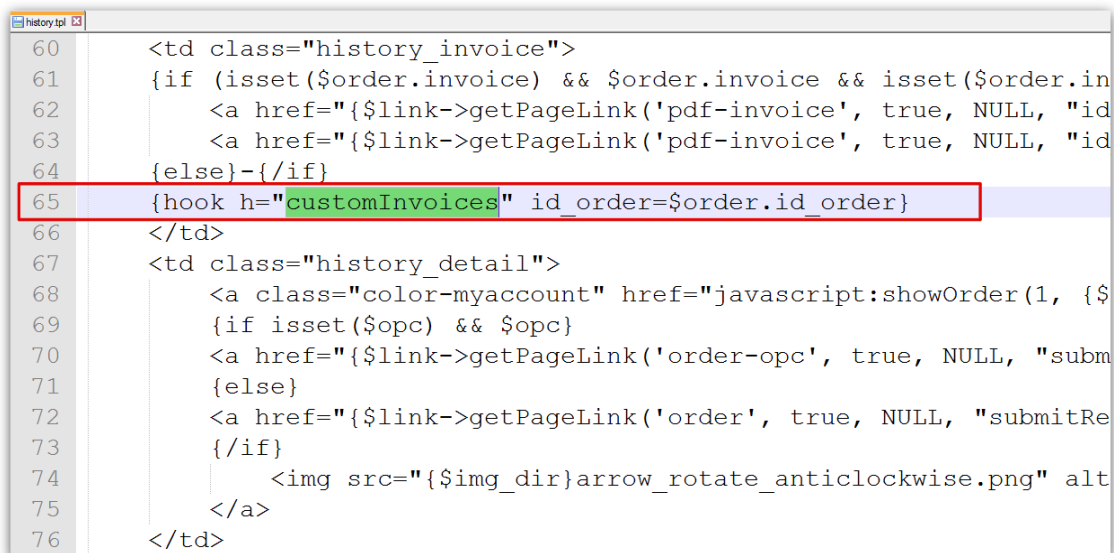

- Insert this “hook”:

```
{hook h="customInvoices" id_order=$order.id_order}
```

into the file {web\_root}/themes/{your\_theme}/**history.tpl**.

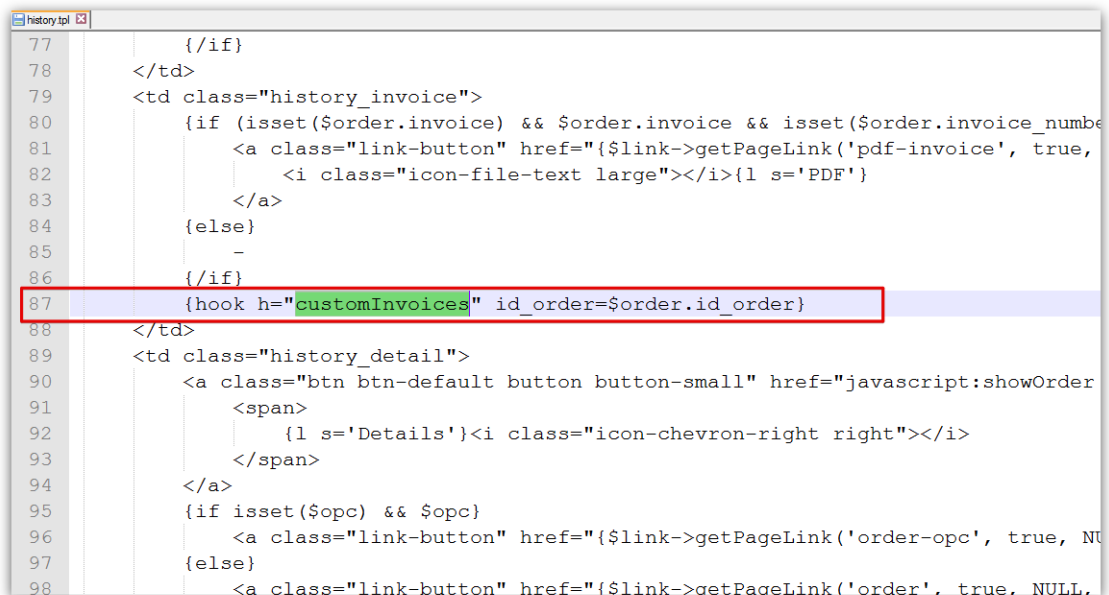

- If you are using the default theme or you did not make any changes to that file, simply copy **history.tpl** from this module. It is under **addons/themes/**.

Here is an example for Prestashop version 1.5.x:

```
60 <td class="history_invoice">
61 {if (isset($order.invoice) && $order.invoice && isset($order.in
62 <a href="{ $link->getPageLink('pdf-invoice', true, NULL, "id
63 <a href="{ $link->getPageLink('pdf-invoice', true, NULL, "id
64 {else}-{/if}
65 {hook h="customInvoices" id_order=$order.id_order}
66 </td>
67 <td class="history_detail">
68 <a class="color-myaccount" href="javascript:showOrder(1, { $
69 {if isset($opc) && $opc}
70 <a href="{ $link->getPageLink('order-opc', true, NULL, "subm
71 {else}
72 <a href="{ $link->getPageLink('order', true, NULL, "submitRe
73 {/if}
74 
76 </td>
```

And another example for Prestashop version 1.6.x:

```
77 {/if}
78 </td>
79 <td class="history_invoice">
80 {if (isset($order.invoice) && $order.invoice && isset($order.invoice_numbe
81 <a class="link-button" href="{ $link->getPageLink('pdf-invoice', true,
82 <i class="icon-file-text large"></i>{l s='PDF'}
83 </a>
84 {else}
85 -
86 {/if}
87 {hook h="customInvoices" id_order=$order.id_order}
88 </td>
89 <td class="history_detail">
90 <a class="btn btn-default button button-small" href="javascript:showOrder
91 <span>
92 {l s='Details'}<i class="icon-chevron-right right"></i>
93 </span>
94 </a>
95 {if isset($opc) && $opc}
96 <a class="link-button" href="{ $link->getPageLink('order-opc', true, NU
97 {else}
98 <a class="link-button" href="{ $link->getPageLink('order', true, NULL,
```
